

Summary of Key Points

Analysis of Exit Destinations by County, Program Type, and Organization

For November 2018

C. Peraro Consulting, HMIS Administrator

The HMIS admin team completed analysis of client exit destinations from HMIS program discharge records for the month of November 2018 (n = 963). The analysis presents findings by county, over program type, and by org/program.

The summary tables show the total exits by destination category, along with permanent housing exit rates. Analysis also includes the total number of exits with unknown exit destination type along with the corresponding exit rates.

Key findings of the monthly reporting include:

- In aggregate, the PH exit rate for November was 51% with 492 of 963 exits leaving to PH destinations, a decrease compared to October (61%), but November's PH rate is well within the range of 2018 PH rates (41% to 61%); a continued improvement trend since November 2017 (33%).
- Of the 492 PH exits, Homeless Prevention programs exited 168 clients to PH (34%), Emergency Shelter programs exited 109 clients to PH (22%), Rapid Re-Housing exited 105 clients to PH (21%), Transitional facilities exited 51 clients to PH (10%) and Outreach programs exited 48 clients to PH (10%).
- Street Outreach and Emergency Shelter project types should not be evaluated solely on exits to PH. Often, placements into institutional settings, transitional shelters, or residential projects are positive outcomes for these project types and the clients within.
- November PH rates descending by county were Hawaii (85%), Kauai (50%), Oahu (49%), and Maui (40%).
- Homeless Prevention and Rapid Re-Housing projects had the highest PH exit rates (99% and 95% respectively). Due to the inherent nature of these programs, however, one would expect that these rates be near 100%.
- The missing exit data rate decreased in November 2018 to 13% (124 clients with unknown exits), a slight improvement compared to October's 14% missing data rate. June 2018 had the lowest rate to date (12%). The missing exit rate first calculated in November 2017 was 34%. Oahu represented 66% (82) of the missing total.
- Oahu and Maui had the greatest proportion of exits to unknown locations in November, with 14% (82 of 590 exits) for Oahu, and 18% (39 of 217 exits) for Maui. ES and Outreach projects accounted for the vast majority of these exits.
- Oahu Street Outreach (31%) and Maui Emergency Shelter (21%) had the highest rates of missing exit data in November.
